# Step-By-Step Instructions to **WeViDeo**

WeVideo will allow you to make a video easily using your photos and videos. Through this free site you will have access to 400 licensed music titles, royalty free graphics, fun effects, easy video editing tools, instant uploads to YouTube/Facebook, collaborative video capabilities and more. This means that you can create a shared video with your classmates using different computers and access your video from any computer. AWESOME! **Here are directions:**

Step #1: Sign up for a free education account by going to **wevideo.com** and clicking ➞ **SIGN UP**

Step #2: Go through the training module and watch the tutorial videos found on the web site
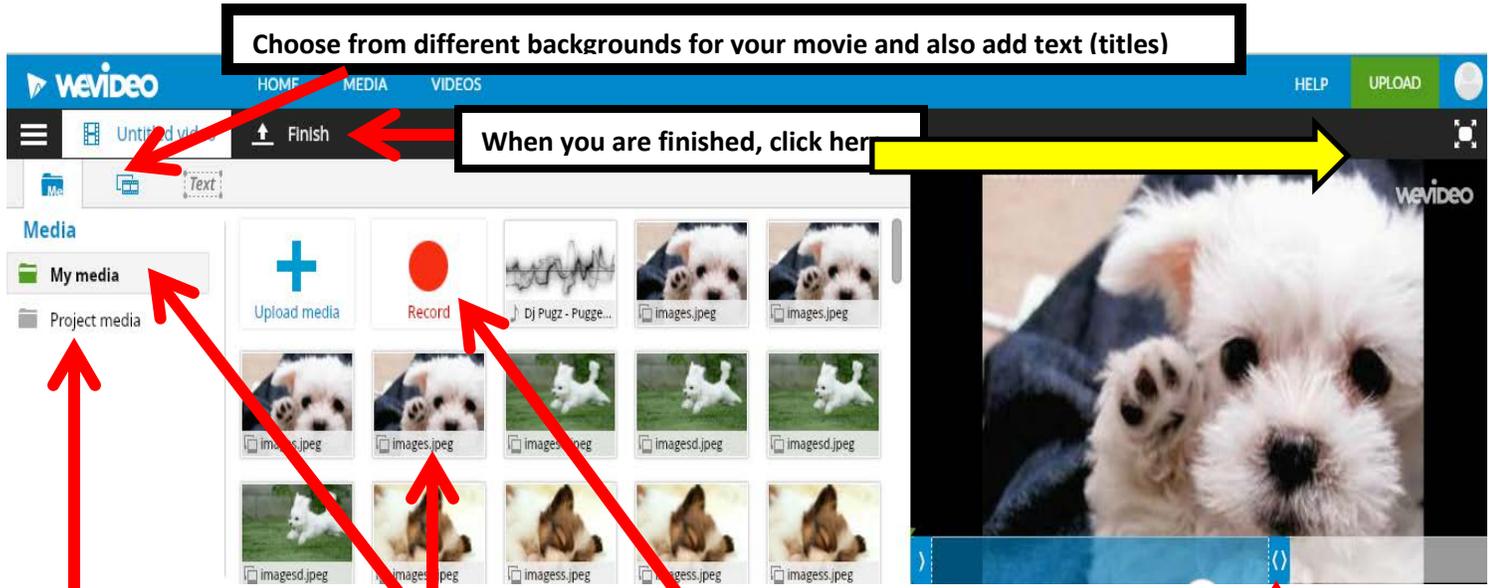

You do not have any edits yet.

Upload your photos and videos here. → UPLOAD MEDIA   CREATE A VIDEO ← **Click here to start your video.**

Once you create an account, you can watch all of the tutorial videos by clicking the Help button.

Start using WeVideo
If you ever need help, click the ? icon from the editor menu.

Watch a short video
This short video will show you the basics of the WeVideo editor.

Start editing   Watch video

Once you have trained yourself by watching the videos, click "Start Editing"

Before beginning your project, watch this video

If you have shared this project with others, then their uploaded content will appear here.

All your photos, videos, and music are loaded here once you upload them. Just drag and drop them to your storyboard to arrange and create.

If you have a document camera or webcam attached to your computer, you can click the record button and record directly into this program.

You can crop your videos and pictures by dragging the blue arrows on the cropping tool.

If your computer has a microphone you can record a voiceover.

Select your music here. If you want multiple tracks you will need to switch to the Timeline mode using the menu on the top left.

Add effects to your content by clicking here.

Drag and drop your backgrounds, photos, videos and content here and then rearrange.

When you are completely finished editing your video, click the **FINISH** button. You can publish directly to WeVideo, YouTube, Vimeo and more.

We recommend publishing directly to WeVideo so that you can get a direct link to your video that you can share with your teacher through eClass. Remember you only get 5 minutes of export time a month, so don't finalize your video until you are SURE it is complete.

Once you create your video, click on the SHARE link to copy and paste into your eClass page for your teacher to see.
